

BC8000 Battery Capacity Tester & Battery Charger

The BC-8000 has been designed to provide the operator with accurate battery charging and capacity testing with ease of operation.

Capacity Tester Features include:

Adjustable constant current load in 0.1 Ampere increments from 0.5 Ampere to 15 Ampere (+/- 1.5%), Adjustable constant current load in 1.0 Ampere increments from 15 Ampere to 50 Ampere (+/- 1.0%), USB 2.0 port for PC connection, BC Report Utility software for hard copy printout of test results.

Charger Features include:

Adjustable output from 3.0 to 36.0 Vdc (0.1 steps), Adjustable output amperes from 0.05 to 25A dc, Constant voltage or constant current charge, Adjustable charge time from 1-999 min, Single or two step charge routine.

Common Features:

Universal AC power input 90~264vac (47 to 64hz), 4 line LCD display, 10mv voltage resolution, Over temperature protection, Audio warning when capacity test is complete or malfunction of the unit, Real time internal clock with battery backup, 1 year warranty.

12.00" L (304.8mm) 9.00" W(228.6mm)
16.00" H (406.6mm) 19lbs (8.62kg)

BC5000 Battery Capacity Tester

The BC-5000 has been designed to provide the operator with accurate battery capacity testing and ease of operation.

Features include: Tests 12/24 volt lead acid batteries from 10-50 AH, Cables Included, Constant current load in 1 Amp steps, Battery powered operation, LCD display, 50 MV voltage resolution, Over temperature protection, Audio warning when capacity test is complete, 1 year warranty.

12.00" L (304.8mm) 9.00" W(228.6mm)
10.00" H(254mm) 10lbs (4.5kg)

BC6000 Battery Capacity Tester

The BC-6000 has been designed to provide the operator with accurate battery capacity testing and ease of operation.

Features include: Tests 12/24 volt lead acid batteries from 10-50 AH, Constant current load in 1 Amp steps, Battery powered operation. No AC power required, LCD display, 50 MV voltage resolution, Over temperature protection, Audio warning when capacity test is complete, USB PC connection, BC Report Utility software for hard copy printout of test results. 1 year warranty

12.00" L (304.8mm) 9.00" W(228.6mm)
10.00" H(254mm) 10lbs (4.5kg)

BC9000 Battery Charger

The BC-9000 has been designed to provide the operator with accurate battery charging with ease of operation.

Charger Features include:

Adjustable output from 3.0 to 36.0 Vdc (0.1 steps), Adjustable output amperes from 0.05 to 25 A dc, Constant voltage or constant current charge, Adjustable charge time from 1-999 min, Single or two step charge routine

Common Features:

Universal AC power input 90~264vac (47 to 63hz), 4 line LCD display. 10mv voltage resolution, Removable DC Charge Cord, Anodized Aluminum Case, Over temperature protection, 1 year warranty

14.00" L (335.6mm) 9.250"W (234.6mm)
9.50" H (241.3mm) 14lbs (6.350kg)

BC7000 Battery Capacity Tester

The BC-7000 has been designed to provide the operator with accurate battery capacity testing and ease of operation.

Features include: Tests 12/24 volt lead acid batteries from 0.5-50 AH, Adjustable End Point Voltage (EPV), Battery Discharge Mode to 1V EPV, Adjustable constant current load in 0.1 Ampere increments from 0.5 Ampere to 15 Ampere (+/- 1.5%), Adjustable constant current load in 1.0 Ampere increments from 15 Ampere to 50 Ampere (+/- 1.0%), Universal AC power input 85~264vac (47 to 64hz), USB PC connection, BC Report Utility software for hard copy printout of test results. 1 year warranty

12.00" L (304.8mm) 9.00" W(228.6mm)
7.50" H(190.5mm) 10lbs (4.5kg)
