

CCB-38000 QUICK DRAIN VALVE FOR LYCOMING ENGINES NOW FAA-PMA APPROVED

Curtis has developed and CERTIFIED a new low profile drain valve to fit in applications where there would be an interference from landing gear operations, hoses, and other objects preventing the use of an oil drain valve and operation of draining oil. These components are anodized for corrosion protection (does not include hose & clamps). Activation Tool can be purchased separately if lost.

CCB-38000 Oil Valve
