ADVANTAGES:

- 100,000 Hours of Life
- Low Operating Temperature
- Greater than 90% Power Savings
- Approved in More than 50 Different Aircraft
- No Modification Required
- Global Dealers

LED LIGHTING INTERIOR UPGRADE

PWI's LED reading lights provide 100,000 hours of life, which means our LED lights might be the last reading lights your aircraft will need. LED lights are also a whiter and more efficient alternative to incandescent bulbs.

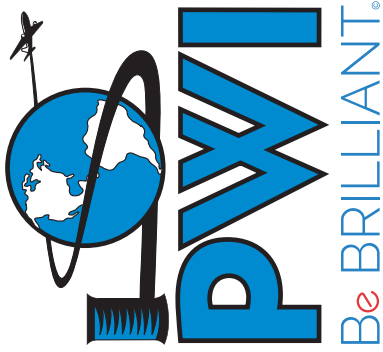

PWI's lights are cool to the touch. They also operate on significantly less power and are more cost-efficient over the life of the aircraft. PWI lights can be quickly and easily installed in a variety of models including piston, turboprop, and jet aircraft. Purchase PWI LEDs and never again worry about installing another reading light.
