TRANSPORT CANADA APP#68-94

"We are excited to announce KADEX Aero Supply as a new Authorized AeroShell Distributor serving the Canadian market. As many in the industry know, KADEX excels in serving customer's needs while leveraging their strong technical expertise. This is a great fit for AeroShell, and we look forward to their support in marketing our extensive line of aviation lubricants, including the "World's Best-Selling Piston Engine Oil," throughout Canada."

Luke Byerly, Americas Regional Manager, Shell Aviation Lubricants.

ADEX Cares

COST OF OWNERSHIP CONCERNS HIT HOME

Ken Blow
Vice President & Technical Support

We are always on guard for new ideas to reduce your cost of ownership and to improve availability. Only select

high quality FAA PMA, TC PDA, STC'd materials are added providing they first meet our financial test.

Experience counts - we have 20 years of new part numbers that offer choice - a choice between OEM or PMA. PMA often offers same or better reliability at lower cost which reduces your cost of ownership.

Rapco, Rapco Fleet Support, HEMICO, PMA Products, McFarlane, and many more manufacturers are solid examples of folks we work with every day.

PPG Aerospace Transparencies

★ King Air/1900 WINDSHIELDS

Special Offer • Free Installation Kit with Window Purchase Requires return of an unserviceable PPG-manufactured windshield

November 1, 2016 to January 31, 2017

"PPG is pleased to offer operators an extended warranty (36 months) on these rebuilt windshields as a result of their exceptional reliability that is comparable to the new parts," Mark Hood, PPG global director, general aviation transparencies, said. "As the manufacturer of the certified original-equipment windshields for the King Air and spares for both the King Air and 1900 airplanes, PPG rebuilds parts to the latest Beechcraft-approved design configuration. Aircraft operators have lower-cost alternatives to buying new spares without compromising performance or quality, and now PPG supports that with an even longer warranty - now to 36 months." Hood attributed the proven performance of the PPG-rebuilt windshields and OEM parts to proprietary robust heating systems and moisture seals that protect the windshields from environmental degradation.

PPG is certified by the Federal Aviation Administration to rebuild windshields and uses the same materials and processes to rebuild the King Air and 1900 windshields as it does for new parts. Rebuilt windshields for King Air airplanes are supplied with SURFACE SEAL® hydrophobic coating, as are new and spare windshields. The company is based in Huntsville, Alabama where it operates an FAA-certified Repair Station. KADEX Aero is our Canadian Distributor.

YOUR LED LIGHTING SPECIALIST

PROUDLY DISTRIBUTING ALL LIGHTING PRODUCTS FROM WHELEN

→ CONCORDE BATTERY

Conversion to a Concorde RG series Battery has never made more sense than it does today. Original Nicad batteries (while very robust) come with enormous costs and routine maintenance & repair parts. KADEX and Concorde can help you end the cycle and manage your aircraft operating costs.

KADEX and Concorde have many benefits to offer the Piston Aircraft operator as well. Have you ever said "I can't get more than 2 years out of my battery"? - Chances are KADEX and Concorde can find you a solution that will allow you to end the frustration. It could be a battery upgrade, or a Simple Battery maintainer for those weeks you can't get to the airport.

→ DO YOU HAVE THE CORRECT STANDBY GYRO?

Fly with confidence and peace of mind. Fly with Mid-Continent Instruments and Avionics' 4300 Series Electric Attitude Indicator -The Lifesaver®. When your

aircraft panel goes dark, the Lifesaver® powers on. The only electric attitude indicator with a selfcontained battery backup, it delivers one full hour of emergency attitude reference - the precious time you need to land safely.

THE KADEX ADVANTAGE

The KADEX advantage is our experience gained over 23 years. Our experience and depth of product knowledge makes it possible to offer quick answers to your technical questions and requests - we promise personalized attentive service.

Extensive Inventory: We carry plenty of stock in Calgary and Peterborough ready for you when you need it. With two time zones our long service day is a welcome feature.

Superior Value Added Services:

- · Technical Sales Specialists
- AOG & After Hours
- · R & O Management
- Asset Management
- Tools
- PMA/PDA/STC Parts Development

Flexible Inventory Management: Our long supply chain allows you to remain focused on core activity - leave the spares to KADEX. With our extensive stock you don't need to carry nearly as much inventory. Keep costs off your books until it's absolutely necessary.

*Supply agreements to remove spot buying are a welcome feature.
