STRATOFLEX Hoses & Kits

Custom hoses within a day or two. Call with your hose part #.

"Engine Kits" available for PA 18, 23, 24, 28, 30, 31, 34, 42, 44, 60, 601.

FUEL CELLS

One-piece ring positioned inside access hole - bolt holes in fabric for easy installation.

Two piece aluminum ring with threaded steel inserts cast in place.

Nitrile rubber skin for fuel cells is compatible with all types of fuel.

Aluminum fuel fill and/or transfer port rings are vulcanized in position.

- Soft, flexible and easy to install - will not become stiff and brittle. Fuel cell fabric has an integral fuel vapor barrier, eliminating seepage problems and making them stronger, longer lasting and more resistant to porosity.
- Installation Gaskets Kits are available to eliminate delays
- Manufacturers Rebate for Cessna, Beech, Piper - inquire for info.

AIRCRAFT TIRES & TUBES

- Advanced new rubber compounds were developed which provide even longer life than before for a low cost-per-landing.
- Sophisticated production techniques were employed to balance stresses within the tire structure, resulting in better characteristics for smooth taxiing and long life.
- New sidewall configurations were designed to reduce the number of potential sites for ozone initiation which can cause premature aging.

Experience the Ice Shield Advantage - FASTER, BETTER, SMARTER

One of the huge advantages of the Ice Shield boot is that it uses newer technology than the Goodrich boot. Goodrich still uses the old "tube type" construction as used in the old 23S series boots of the 1970's. Ice Shield boots are the newer sewn boots of the 25S and 27S series. We also have a beveled edge that lays flatter and helps eliminate curl up on the edges as well as a roughed wing side surface for better adhesion to the wing.

Up to 70% longer service life results in lower costs for you. Longer lasting ice protection.

LARGEST OEM OF LEAD ACID BATTERIES

Certified for Replacement of Piper original units

- Superior starting power in extreme heat & cold
- Reliable essential power in the event of generating system failure
- Robust design for tolerance to vibration & shock
- Longer life
- Recovers from deep discharge
- Maintenance Free. RG Series. Never need electrolyte
- RG series ship fully charged from factory.
