Main Windshield

Features	Benefits
Composite Windshield Technology	<ul style="list-style-type: none"> • Combines toughness of glass with high impact resistance and high strength-to-weight ratio of polycarbonate • Lightweight • Proven design
Original Equipment Manufacturer (OEM) Since Program Inception	<ul style="list-style-type: none"> • Latest design configuration and upgrades • Approval recognized by worldwide aviation authorities • Proven reliability

Side Cockpit Window

Features	Benefits
Stretched-Acrylic Plies	<ul style="list-style-type: none"> • Lightweight
Original Equipment Manufacturer (OEM) Since Program Inception	<ul style="list-style-type: none"> • Proven reliability

PPG Aerospace – Transparencies is a leading and experienced manufacturer of replacement windshields and cockpit windows for Embraer Legacy 600 and Legacy 650 airplanes.

The main windshield is a glass-faced polycarbonate-acrylic laminate, combining the toughness and chemical resistance properties of glass with the weight-saving benefits of plastic. Two polycarbonate main plies provide high impact resistance and have a high strength-to-weight ratio, while an acrylic inboard ply affords scratch resistance.

PPG Aerospace produces original-equipment transparencies for Legacy 600 and Legacy 650 airplanes. As an OEM supplier, PPG Aerospace is able to provide operators with replacement transparencies that are upgraded to the latest design configuration.

Operators know they can count on PPG Aerospace for transparencies that provide significant value because of their reduced life-cycle cost as a result of their exceptional service life.
