

# PPG SURFACE SEAL® hydrophobic coating

Surface Seal hydrophobic coating gives the pilot windshield (upper image left) enhanced visibility during wet conditions compared with the untreated co-pilot windshield (upper image right) as demonstrated by this simulation

Surface Seal hydrophobic coating is an industry-leading rain/water shedding coating system designed for glass and anti-static coated glass windshields.

## Surface Seal hydrophobic coating is:

- UV Resistant
- Compatible with most aerospace cleaning and maintenance fluids
- PFOA-free product (REACH & EPA compliant)

## PPG gives operators with three ways to obtain a cost-effective and efficient visibility enhancement in wet conditions :

- Factory-supplied parts with Surface Seal coating for convenience and optimal service life
- Standard Surface Seal coating application kits for field application and long service life
- Quick Surface Seal coating application kit for fast and easy treatment

	Part Number
Standard application kit <ul style="list-style-type: none"> <li>- Commercial aircraft window size</li> <li>- General aviation window size</li> </ul>	DSS 4020 DSS4040G
Quick application kit	DSS 4200
