

PROPELLER DE-ICERS

Ice Shield™ offers a diverse line of propeller boots for a variety of piston and turboprop aircraft in both wire-wound pattern and etched foil design. Whatever your propeller needs, you can feel confident that you are receiving a superior quality product from a company dedicated to your satisfaction.

Ice Shield propeller de-icers feature:

- Tapered edge design for easier application and superior aerodynamic transition
- Aeroguard™ surface technology. Proven to provide superior rain and sand erosion performance.
- Textured bond surface provides superior adhesion.
- Wire harnesses available in a variety of lead configurations from traditional ring terminals to quick disconnect systems.
