

LED ICE LIGHT

Bayonet Mount

Threaded Mount

ADVANTAGES:

- Direct Replacement for Incandescent Bulbs A7079B24, MS25338-7079, and WA7079B24
- Significant Reduction in Heat, Eliminating Lens Degradation
- Significant Reduction in Power Requirements
- 28V Power
- 730 Lumens

Aircraft Compatibility:

Beechcraft 55, 58; 90 Series, 100 Series, 200 series, 300 Series; 400, 400A; 99 Series

Cessna 208, 208B; Centurion 210, P210, T210; 441; 525 Series, 550 Bravo, 560, 560XL, 650 CVII, 680, 750

LED LIGHTING EXTERIOR UPGRADE

The PWI LED Ice Light features many improvements over the factory-installed incandescent bulbs A7079B24, MS25338-7079, and WA7079B24. The LED Ice Light offers the brilliance necessary to check for ice formation. Enhancements include a significant reduction in power draw, as well as a lifespan of up to 100,000 hours. PWI's LED Ice Light also reduces radiant heat which can lead to long-term window degradation.
