

SOCIAL RESPONSIBILITY

KADEX recognizes the importance of giving back to the community. We focus on environmental protection, economic achievement and social contribution.

We are committed to the protection of the environment through responsible and environmentally friendly operating practices. KADEX employees are encouraged to participate in undertakings geared towards improving the environment in both their workplace and the community. We also enjoy contributing to the growth and successes in our hometowns. We have many connections beyond our customers and suppliers that extend into various communities, which include charities, fundraising events and community organizations.
