***REPLACEMENT AIRCRAFT PARTS CO.***

**OEM Quality.  
 RAPCO Price.**

At Rapco, our first consideration is quality. Our FAA-PMA approved replacement aircraft parts are manufactured to meet or exceed the original manufacturers' design and performance standards. We then subject them to meticulous quality control testing and inspection procedures.

Years of experience, the latest technology and low overhead enable us to produce a broad range of replacement parts that meet the rigid FAA standards for safety and performance at the lowest possible cost. We pass these savings on to you.

**Flexibility.**

Lower price is not the only RAPCO advantage. Because we are not as big as the OEM, in addition to our savings, we can offer some things they cannot: Flexibility and Timing.

Our quick turnaround, with most orders shipped same day, has provided an extra edge in earning repeat business. If we do not have a product on the shelf, we make it.

**Availability.**

Call **KADEX** for all your Rapco parts. "Your Canadian Distributor!" Call **KADEX** now to start saving money on our fully guaranteed, FAA-PMA approved replacement components.
